OUR ORGANISATIONS PROFILE

About Us,

We NVIO , are pleased to introduce ourselves as a designer, manufacturers and suppliers of Water and Waste Treatment Plants, Pumps and Pumping Systems, Solar systems, Rain water Harvesting, Swimming Pools and Control panels.

We design and supply the complete suitable system as one skid, as per the enclosed specifications. Unlike commercial suppliers offering the default systems and prices but we design and offer the price of the RO Plants, ETP, STP, and WTP only after studying your raw water chemistry. So, for the raw water availability, the system would be customized and thus perfect solution to the clients is ensured. We are sure that our price of our products would be very competitive, without compromising any quality and service. Instead, for ensuring the quality, you can compare our BOM of the plant and the BOM of the plant offered in the market.

We have completed more than 100+ RO Plants in government and private sectors and 300+ waste water treatment plant projects towards getting environmental clearance from all over Kerala, Tamil Nadu and other states in India – Power plants, Sugar, Distilleries, Mines, Airport, Pharmaceuticals, Chemicals, Foundries, Electroplating units, Steel plants, Industrial park, I.T. park, Residential complex, Commercial complex, Hotel Etc.

Beyond the business, we offer consultancy service for water problems & pumping systems, at free of cost. We also do projects and supply of equipments for all kind of water treatment and pumping systems. For your needs of completer water treatment and pumping solutions, kindly forward your enquiries to **info@nviowatersolutions.com**

We adopt high-quality raw material & advanced technologies in manufacturing process. Our products are widely acclaimed for their low maintenance cost, high contaminant holding capacity and long working life with good flow.

For NVIO Water Solutions

SHAHIDA VADKETHIL

Products and Services:

Being reckoned as one of the trusted names in the area of offering complete water management solutions, we have come up with an exhaustive range of products and services addressing to the consistent problem of unhygienic and unsafe drinking water.

Our range manufactured from top grade quality Mild Steel and Stainless Steel comprises of GS - water purification systems, sand filters, multi grade filters, and Reverse Osmosis Systems and water purification systems.

On the other hand, our service portfolio comprises of erection and commissioning, operation and maintenance, servicing consultancy services and design engineering consultancy services .

Our ranges of products have been appreciated for the following factors:

- Safe to operate
- Low power consumption
- Compact design
- Operational efficiency
- Longer service life
- High performance
- Requires less maintenance

Clients have repeatedly rendered our services owing to the following reasons:

- Timely operations
- Efficiently erected and commissioned
- Prompt maintenance and servicing
- Professional consultancy services

In addition to our above mentioned products we also deal in various other water treatment equipment and liquid separators such as membranes and micron cartridge filters, meeting the needs of diverse application purposes including drinking, sea water, pharmaceuticals, electronics, chemicals, mineral water, process, boiler feed, cooling and chilling circuits and others.

Application Areas

We offer our range of water treatment equipment and render our valuable services for the same in the following sectors:

- Residences
- Industries
- Textile and rice mills
- Schools, Colleges & other educational institutions
- Hospitals
- Hotels and restaurants
- Clubs
- Apartments
- Cooling towers
- Villas
- IT Parks
- Commercial Complex

Infrastructure

We have developed a well organized infrastructural set up to design and engineer our comprehensive range of water treatment equipment. Our infrastructural unit is segregated into the following units for us to facilitate our production capacity and reduce the lead time.

- Procurement of raw materials
- Material handling
- Designing
- Production
- Quality Control
- Warehousing and Packaging

We are equipped with the necessary tools and machinery required for the production of the water treatment equipment. Also, with the aid of state-of-the-art facilities for the analysis of water generated, we can assess the functioning and efficiency of our range. We make sure in implementing the latest technology so as to deliver world class equipment. Following are some of the tools that aid us in meeting the production targets within a stipulated time frame:

- Cutting machine
- Buffing Machine
- Welding machine
- Lathe machine
- Grinding Machine
- Special Purpose machine
- Planner

Every machinery is regularly maintained by an able technical team, who also make sure in introducing the necessary up-gradations to keep pace with the changing techniques of designing and engineering.

Our Team

Our organization is led by an enthusiastic and highly qualified team of professionals chosen through a stringent screening process. Their untiring effort towards offering clients with quality tested water treatment equipment is reflected through their commitment towards work and client satisfaction.

They constantly endeavor to meet the client expectations and therefore make a prompt and timely delivery of Equipment and services. Nurturing an experienced team of personnel comprising of engineers, technicians, service engineers and chemists, we have been able to establish ourselves as one of the leading manufacturers and service providers in the industry.

Their vast experience and industry know how has enabled them to keep pace with the cut throat competition and come up with an effective solution for water management. They are well equipped to work in coordination with clients and accordingly cater to their needs through uncompromised quality water treatment equipment and consultancy services. Our customer support team functions day and night to provide prompt and valuable assistance and also takes care that client suggestions are met and grievances are immediately taken care of.

Quality Assurance

Commitment towards quality has been an indispensable part of our organization, which is the reason we adhere to stringent quality control measures right from the initial stage of designing, fabrication to installation. Our efforts are always directed towards ensuring clients of optimum quality, making sure that the designs implement the client given specifications. This further helps us to design, fabricate and supply a range at par with the client requirements and expectations.

Every stage is carefully monitored and a series of inspections carried out to make sure that our range conforms to the international standards and specifications. Following are some of the parameters on which our product is tested, helping us to assess the functionality and performance of the equipment:

Resulting water:

- PH value
- Hardness
- Presence of harmful impurities

Water treatment equipment:

- Presence of excess salts
- Filtration of impurities and contaminants
- Operational Efficiency and performance
- Functional stability

Once our range conforms to the above parameters they are sent to the packaging department, where in further the quality auditors make sure that the experts make use of durable and high quality corrugated boxes, cartons and sheets.

Client Satisfaction

Clients have always been an important aspect of our organization as it is owing to them that we are able to witness remarkable growth and success over the last five years. We continually innovate and improvise our range of equipment so as to make sure that we are able to offer the best of water treatment equipment to our clients. Further, for client convenience we also offer valuable set of services that include erection and commission, operation and maintenance and other consultancy services. With such steps, we continually aim to deliver clients with desired results and make certain that any client grievance received is soon taken care of.

Moreover, maintaining consistency in quality, timely dispatch and execution and ethical business policies enable us to garner the trust and confidence of clients from across the country. Some of the major clients we have been associated with are as follows:

Why to choose us?

Following factors make us a preferred choice amongst clients:

- World class facilities
- Stringent quality control measures
- Timely dispatch
- Prompt client servicing
- Ethical business policies
- Easy payment mode through Letter of Credit

Products & Services

Industrial / Commercial:

- **Oil and grease traps**
- **Pressure Sand Filter**
- **Softening Plant**
- **Activated Carbon Filter**
- **Water Treatment Plant**
- **Iron Removing Filter**
- **Mineral Water Plant**
- **Micron Cartridge Filter**
- **Reverse Osmosis Plant**
- **Chemical Dosing System**
- **Ultra Filtration / Nano Filtration**
- **Ozonators / Ultra Violet System**
- **Hydro Pneumatic System**
- **De-mineralized Plant**
- **Sewage Treatment Plant**
- **Effluent Treatment Plant**

Domestic: Services:

- **Reverse Osmosis System** ● **Erection & Commissioning**
- **Water Treatment System** ● **Operation & Maintenance**
- **Pressure Boosting System** ● **Design Engineering Consultancy**
- **Softening Plant** ● **Consultancy**

SOME TREASURED CLIENTS:

COMMERCIAL AND APPARTMENTS

 NESTO HYPERMARKET	 RELIENCE FRESH	 GRAND VIEW
 RK GROUP	 GDS HYPERMART	 SR MILK
 PAZHERI PROPERTIES	 TEA TIME APPARTMENTS Designer	 DOPA RESIDENCY CORPORATION

HOTELS
